DMX<sup>3</sup> frame 1600

DMX<sup>3</sup> frame 2500

DMX<sup>3</sup> frame 4000

Electrical panel equipped with DIN rail and plate mounting MCBs and DPX<sup>3</sup> MCCBs up to 1 600 A

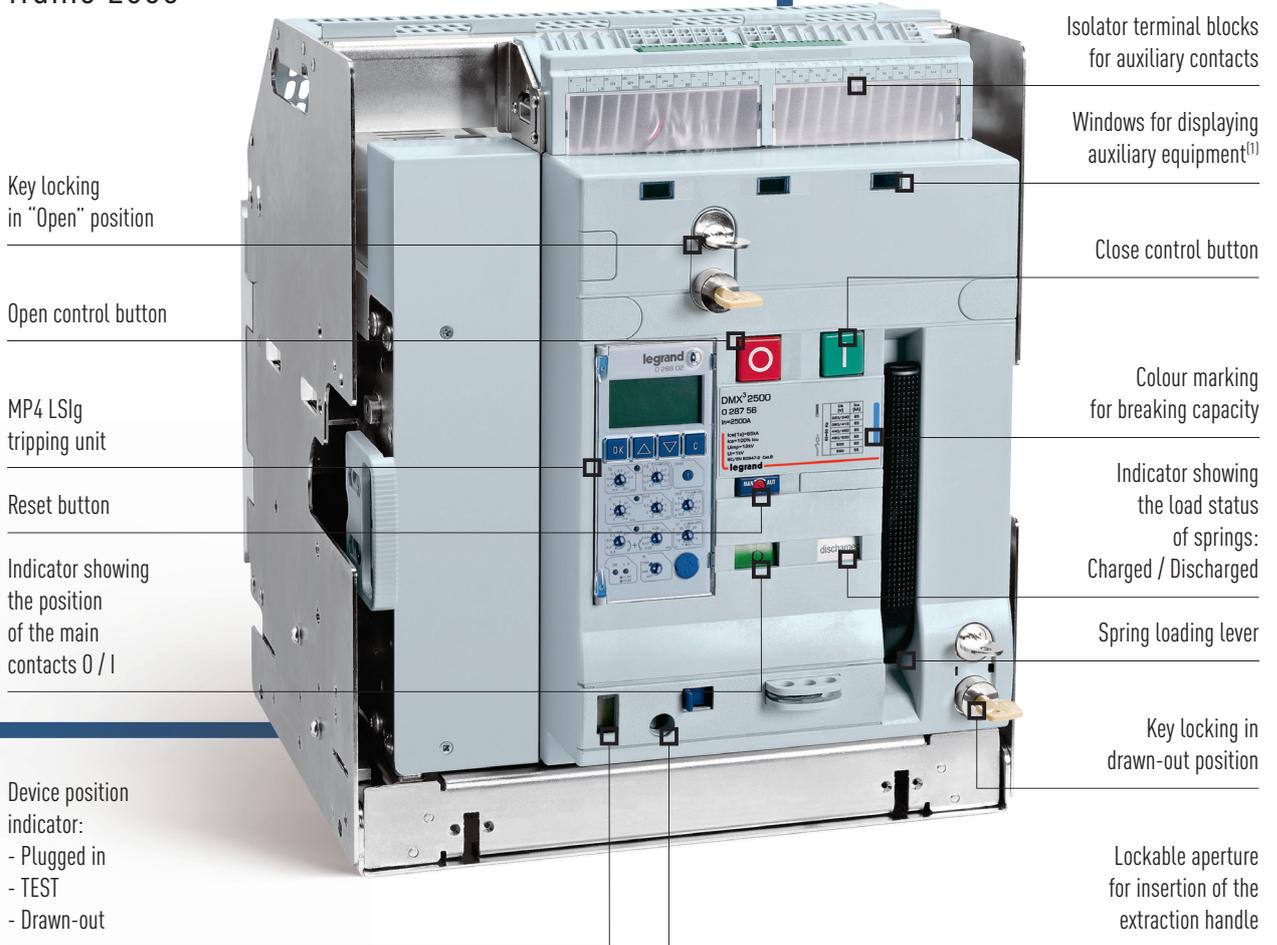

Main electrical panel equipped with DPX<sup>3</sup> MCCBs and DMX<sup>3</sup> ACBs up to 6 300 A

Thanks to DPX<sup>3</sup> range of MCCBs and to DX<sup>3</sup> MCBs you can benefit of the advantages of a complete protection system at any level of the installation

DMX<sup>3</sup> frame 6300

## Draw-out DMX<sup>3</sup> frame 2500

# Optimized performance up to 6300 A

DMX<sup>3</sup> air circuit breakers and DMX<sup>3</sup>-I isolating switches are available in four frame sizes. Four breaking capacities for circuit breakers: 42 kA, 50 kA, 65 kA and 100 kA.

The range covers 11 rated currents, between 630 A and 6300 A. All range of DMX<sup>3</sup> air circuit breakers and DMX<sup>3</sup>-I isolating switches is available in fixed and draw-out version.

- DMX<sup>3</sup> 42 kA
- DMX<sup>3</sup> 50 kA
- DMX<sup>3</sup> 65 kA
- DMX<sup>3</sup> 100 kA
- DMX<sup>3</sup>-I

(1) Available only on DMX<sup>3</sup> 2500, 4000 and 6300

**BREAKING CAPACITIES AND RATED CURRENTS**

(2) For trip-free switches, please consult us

(3) Including base

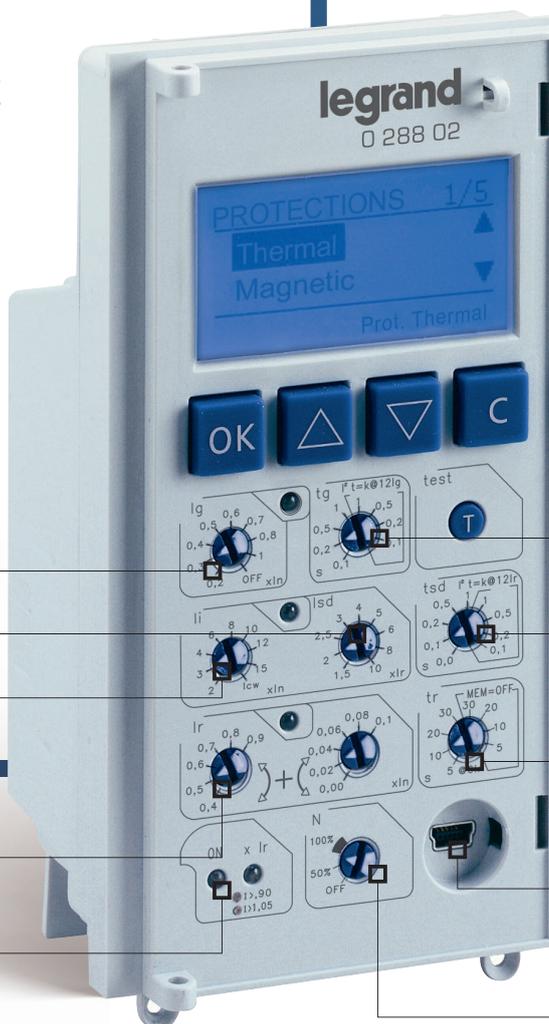

The overall dimensions of the breaker contribute considerably to an efficient use of the space inside the electrical panel. The constant depth for all the rated currents, for the frames 2500, 4000 and 6300 facilitates configuration of the enclosures and connection of the busbars.

Rated operational voltage U<sub>e</sub>: 690 Vac 50/60 Hz  
 Rated insulation voltage U<sub>i</sub>: 1000 Vac 50/60 Hz  
 Rated impulse withstand voltage U<sub>imp</sub>: 12 kV  
 Category of use: B  
 Ambient temperature: - 25 °C to 70 °C  
 Humidity: + 55 °C with relative humidity of 95%, conforms to IEC 68-2-30

# Precise & user friendly LCD tripping units

Besides their easy mounting and connection, strength and good continuity of operation, 3 types of electronic units allow precise adjustment of different limits for current values and time delay.

The result is an efficient protection against electrical faults while maintaining total discrimination with downstream breakers.

The LCD display lets you monitor the measured current values and informs you on fault adjustment and log (the cause of last trip and maintenance operations).

**MP4 LI ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 64 AND 0 288 00**

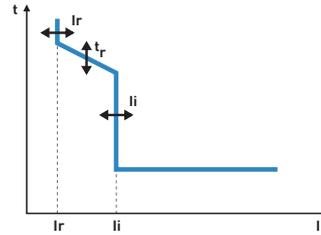

0 281 64

0 288 00

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads:  $I_r$
- Long delay protection operation time:  $t_r$
- Instantaneous protection against very high short circuits:  $I_i$
- Neutral protection:  $I_N$

**MP4 LSI ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 65 AND 0 288 01**

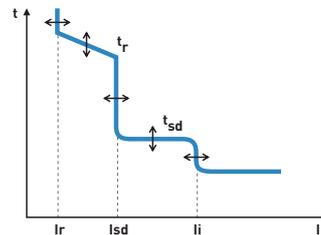

0 281 65

0 288 01

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads:  $I_r$
- Long delay protection operation time:  $t_r$
- Short time delay protection against short circuits:  $I_{sd}$
- Short time delay protection operation time:  $t_{sd}$
- Instantaneous protection against very high short circuits:  $I_i$
- Neutral protection:  $I_N$

**MP4 LSIg ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 66 AND 0 288 02**

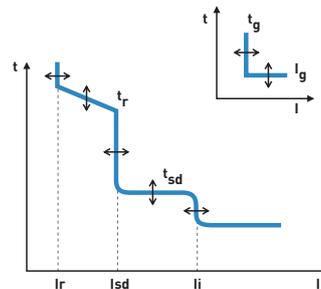

0 281 66

0 288 02

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads:  $I_r$
- Long delay protection operation time:  $t_r$
- Short time delay protection against short circuits:  $I_{sd}$
- Short time delay protection operation time:  $t_{sd}$
- Instantaneous protection against very high short circuits:  $I_i$
- Earth fault current:  $I_g$
- Time delay on earth fault tripping:  $t_g$
- Neutral protection:  $I_N$

All protection units of DMX<sup>3</sup> 2500 to 6300 are equipped with batteries so you can monitor the parameters even when the breaker is not connected and all data remains stored in memory.

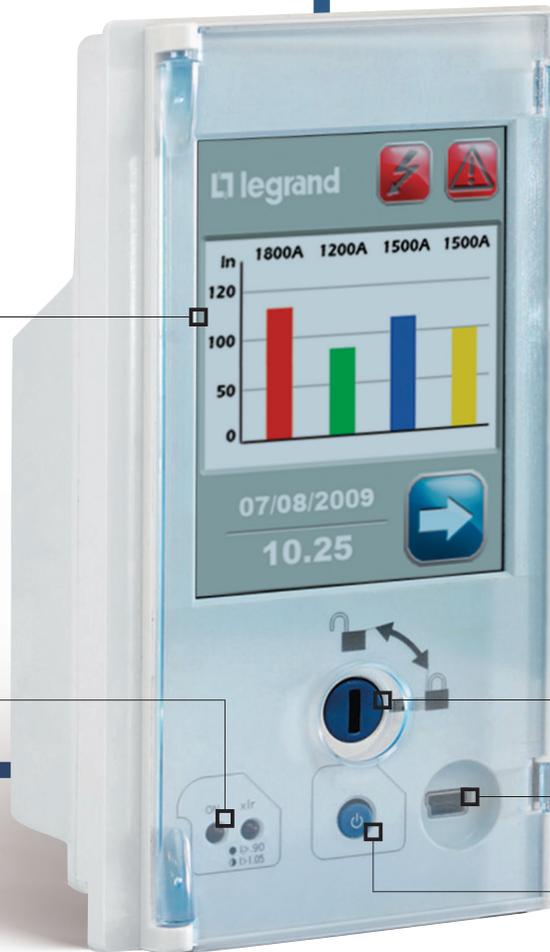

All DMX<sup>3</sup> breakers are factory equipped with any MP4 protection unit LI, LSI or LSIg according to your requirements. You just need to select and indicate the 2 catalogue numbers when placing the order (1 for the breaker and 1 for the tripping unit).

## MP6 LSI touch screen protection unit

Colour touch screen

LEDs indicating correct operation, pre-alarm and alarm for overload and temperature

Settings lock

Mini USB port for PC connection

ON button

# Innovative & user friendly touch screen tripping units

MP6 electronic protection units are equipped with a colour touch screen, particularly user friendly, thanks to intuitive icon-based navigation system. The colour display provides a clear presentation of the parameters of the installation.

Touch screen protection units integrate all the functions of LCD tripping units and have an advanced measurement function which, in addition to monitoring currents, can also be used to display voltages, active and reactive powers, frequency, power factor, and also energy.

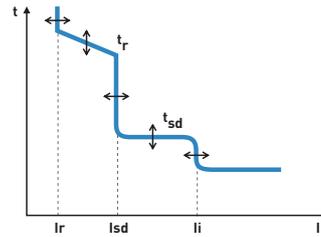

Alarms can be programmed on a number of these parameters: max. voltage, min. voltage, voltage imbalance, max. and min. frequency, etc.

**MP6 LSI TOUCH SCREEN PROTECTION UNIT CAT.NO. 0 288 03**

The following settings are adjusted using the touch screen:

- Long time delay protection against overloads: **I<sub>r</sub>**
- Long delay protection operation time: **t<sub>r</sub>**
- Short time delay protection against short circuits: **I<sub>sd</sub>**
- Short time delay protection operation time: **t<sub>sd</sub>**
- Instantaneous protection against very high short circuits: **I<sub>i</sub>**
- Neutral protection: **I<sub>N</sub>**

- Long delay protection operation time: **t<sub>r</sub>**
- Short time delay protection against short circuits: **I<sub>sd</sub>**
- Short time delay protection operation time: **t<sub>sd</sub>**
- Instantaneous protection against very high short circuits: **I<sub>i</sub>**
- Earth fault current: **I<sub>g</sub>**
- Time delay on earth fault tripping: **t<sub>g</sub>**
- Neutral protection: **I<sub>N</sub>**

Earth fault tripping curve preview

+++++ +++++

**LEGRAND ADVANTAGE**

The icon-based interface of the management software and the innovative touch screen technology used for MP6 tripping units simplify setting and preparing operations of the DMX<sup>3</sup> circuit breaker.

**MORE INFORMATION**

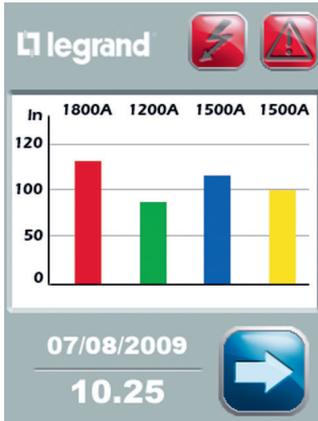

The MP4 and MP6 electronic protection units of the DMX<sup>3</sup> ACBs equipped with communication option Cat.No 0 288 05 or 0 281 70 can communicate via an RS-485 port. This port is used for supervising

(remote monitoring and management) the devices in the installation, using the MODBUS protocol. It is therefore possible to control circuit breaker opening and closing, display the electrical parameters and detect all the alarms generated by each device, from a PC.

Power Control Station is a software application for PCs allowing to exchange data with the protection unit of the DMX<sup>3</sup> through the mini USB port.

This software allows to monitor the status of the breaker, display information (firmware and device versions, alarms, measurements, parameters, fault history, settings), update the firmware of the protection unit, generate reports based on the data stored and read by the protection unit, run diagnostic tests.

## STARTING MENU

This menu displays the values of  $I_1$ ,  $I_2$ ,  $I_3$  and  $I_N$  as a diagram, the date and the hour, and the alarm icon. If the breaker opens following an electrical fault a specific icon will appear on the upper part of the screen. Pressing this icon will open a new window showing the cause of the last event.

Other possible actions:

- Right arrow icon: access the main menu
- Alarm icon: preview the cause of the alarm in course

## MAIN MENU

The main menu allows accessing different windows for setting different parameters of the breaker or previewing measured values, battery status, tripping history, etc.

The following accesses are possible:

- 1 Setting according to the tripping curves (current and time)
- 2 Access tripping unit settings (luminosity, contrast and sound volume)
- 3 Access to general information of the breaker
- 4 Back to the previous page
- 5 Access measured values menu
- 6 Access archives
- 7 Preview battery charging status

# Innovative & user friendly touch screen tripping units

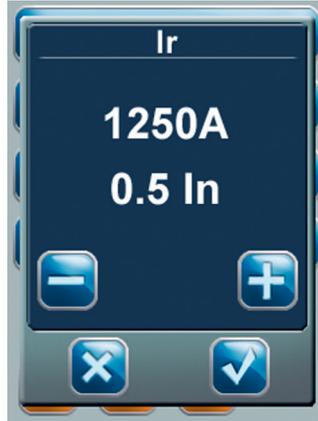

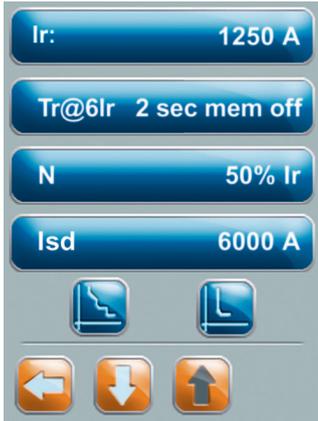

CONTINUED

MP6 electronic protection units collect all the useful information in 5 sections, each one easily reachable via the main menu in order to allow an efficient control.

MP6 electronic protection units have an intuitive graphical interface. All useful information and selected settings are easy to understand and visible at a glance.

For example current values can be visualized on the starting page thanks to a histogram. Different other settings can be simultaneously displayed on the "settings" screen in order to have a global view.

## PROTECTIONS SETTING MENU

**Vertical arrows allow scrolling between different electrical parameters:**

li, lsd, tsd, lr, tr, lg, tg, etc.  
Pressing horizontal icons gives access to corresponding windows allowing value settings. Each value can be increased/decreased, validated or suppressed. The values need to be saved into memory at the end of the process, for each setting.

## MEASURED VALUES MENU

**This window allows previewing of measured values for:**

- Currents
- Voltages (Ph/N and Ph/Ph)
- Active and reactive powers
- Power factor (total and per phase)
- Active and reactive energy
- Harmonics (for currents and voltages)

Pressing **I**, **m**, **M** and **avg** icons at the bottom of the window will display respectively: instantaneous, minimum, maximum and average value of electrical parameters.

+++++ +++++  
+++++ +++++

### MORE INFORMATION

• The following events and values are registered into memory and can be accessed via specific menu: cause of the last event, event counter, events history with date and hour, alarms history with date and hour

- MP6 tripping units allow following application: logical selectivity, management of non priority loads, contact management (with Cat.No 0 288 12)
- MP6 tripping units allow following alarms: power reverse, current imbalance, maximum and minimum voltage values U1N, U2N, U3N, maximum currents I1, I2, I3, voltage imbalance (phase-neutral), inversed phase rotation, maximum and minimum frequency values.

## Draw-out DMX<sup>3</sup> frame 2500

Shunt trip

Undervoltage release

Closing coil

Motor operators

# Fast clipping control accessories

You can remotely control the DMX<sup>3</sup> thanks to its range of accessories: shunt trips, undervoltage releases, motor operators and closing coils.

All the control accessories are simply clipped on to the front panel of the circuit breaker, which is especially configured in order to facilitate the clipping.

Every type of accessory is compatible with its own location, in order to avoid any possible mistake.

## MOTOR OPERATORS

Motor operators, are used for remotely reloading the springs of the circuit breaker mechanism immediately after the device closes. The device can thus be re-closed almost immediately after an opening operation.

To motorise a DMX<sup>3</sup> it is necessary to add a release coil (undervoltage release or shunt trip) and a closing coil.

If the supply voltage of the controls fails, it is still possible to reload the springs manually. Motor-driven controls have "limit switch" contacts which cut off the power supply of their motor after the springs have been reloaded. Motor operators are easy to mount, with only three screws.

Motor operator for DMX<sup>3</sup> 1600, DMX<sup>3</sup> 2500 to 6300

Size	FOR DMX <sup>3</sup>		
	1600	2500 to 6300	
		42, 50, 65 kA	100 kA
Rated operating voltage Vn	24 V ~/=	24 V ~/=

Max. peak current for about 80 ms	2 to 3 x In		
Charging time (s)	5	5	7
Operating frequency (n°/min)	2	2	1

## SAFETY AND PADLOCKING ACCESSORIES FOR AN INCREASED SECURITY

The DMX<sup>3</sup> circuit breakers draw-out types are delivered as standard with safety padlocking shutters preventing access to live terminals. They have a number of other safety devices, such as:

- Key-operated locks:
  - Main contacts open
  - Circuit breaker in draw-out position
- Padlocks for:
  - Main contacts open
  - Contact shutters closed (for draw-out position)
- Door locking in order to prevent the opening of the electrical switchboard door when the contacts of the ACB are closed.

Fixed version equipped with padlocking system

Draw-out version equipped with key-operated locks

# Easy identification of control accessories

Electrical auxiliaries are connected on the front panel on terminal blocks provided for this purpose. Accessories are identified on the front panel.

As the cover has window, it is easy to ascertain, which devices are fitted on the circuit breaker.

## FIXED VERSION-CHOOSE YOUR CONNECTION ACCESSORIES: 3 POSSIBILITIES

The type of rear terminals can be easily changed according to your needs.

The breaker is supplied without terminals.

### REAR TERMINALS FOR HORIZONTAL OR VERTICAL CONNECTION

## DRAW-OUT VERSION: EXAMPLES OF CONNECTIONS

Draw-out version of the DMX<sup>3</sup> breakers is supplied with rear terminals for flat connection with bars.

You can easily transform the rear terminals into vertical or horizontal type by using the unique reversible connector.

### CONNECTIONS: A FEW RECOMMENDATIONS!

- Connections provide the electrical connection of equipment and are also responsible for a considerable proportion of their heat dissipation.
- Connections must never be under-sized.
- Plates or terminals must be used over a maximum area.

- Heat dissipation is encouraged by arranging the bars vertically. If an uneven number of bars is connected, place the higher number of bars on the upper part of the terminal.
- Avoid bars running side by side: this causes poor heat dissipation and vibrations.
- Place spacers between the bars to maintain a distance between them which is at least equivalent to their thickness.

## Automatic transfer switches

Stylish ergonomic design

Backlit screen, very easy to read, adjustable brightness and contrast. Menu available in 5 or 8 languages depending on unit model

Clear marking on the front panel for easy identification of the various functions

Touch-sensitive buttons for programming the various operating parameters directly on the control unit

The optical communication port on the front can take a USB or a Wi-Fi connection module, which allows communication with a computer, smartphone or a tablet for programming, diagnostics and data downloading, without having to cut off the power to the electrical panel.

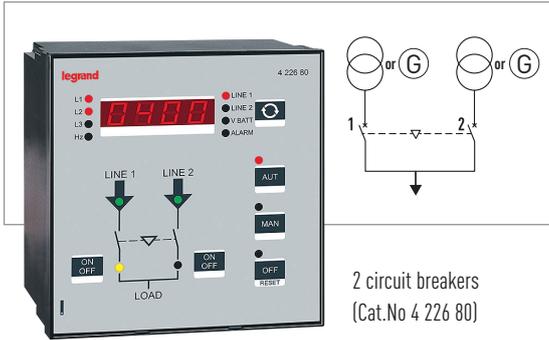

# Continuity of service & increased safety

Automatic transfer switches answer the double need of continuity of service and greater safety (security). Traditionally used in hospitals, public buildings, industries with continuous manufacturing

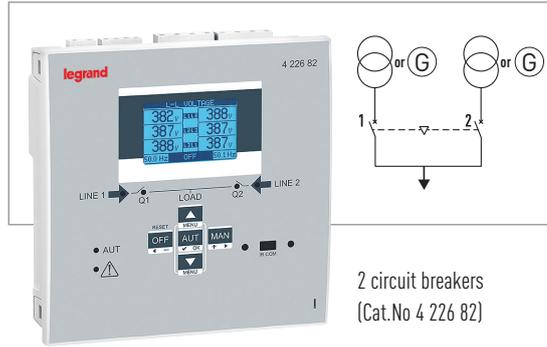

processes, airports and military applications, automatic transfer switches become increasingly required for new applications such as telecommunications and computing treatment or in the management of

energy sources, notably those say "renewable energies". Our range of control units includes 3 different types, depending on the desired service level.

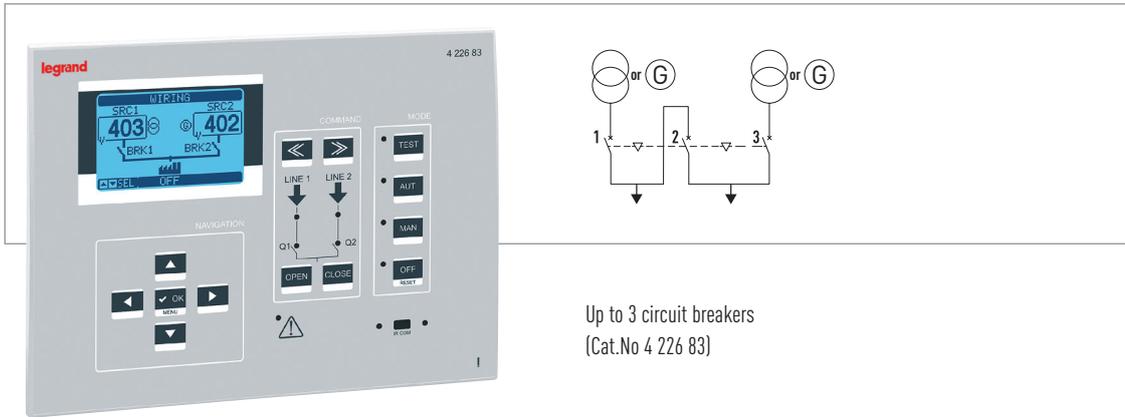

### STANDARD UNIT

### CONFIGURABLE UNIT

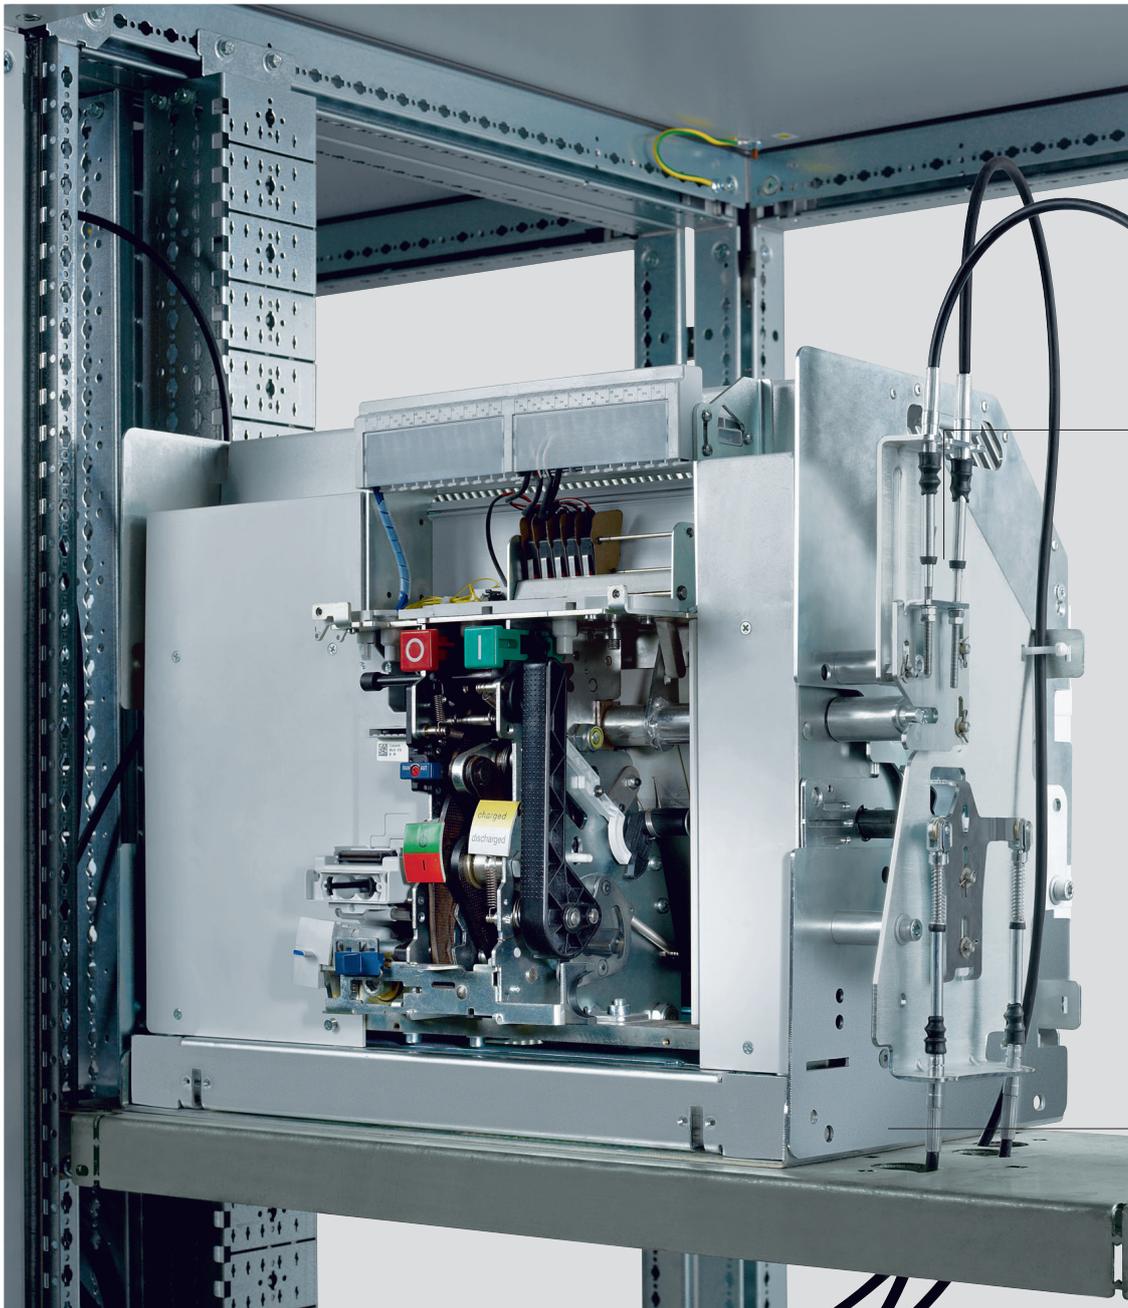

### CONFIGURABLE UNIT

Configurable models are fitted with an optical port designed to take communication modules. These modules can be used to configure the control units via a PC, tablet or smartphone, on which the software or Legrand app has already been installed.

Thanks to its digital displays and different LEDs it is possible to watch permanently the state of the inverter, as well as the presence and the value of the voltage on each power supply.

Mechanical interlock device

Cable for mechanical interlock

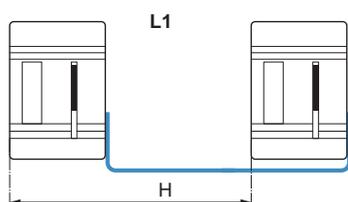

# Transfer switching & interlocking

Mechanical interlock is set up using cables and a mechanical interlock device and can interlock 2 or 3 devices, which may be different type in a vertical or horizontal configuration.

The interlock device is mounted on the right-hand side of the air circuit breaker.

### DMX<sup>3</sup> 1600

Horizontal configuration

DMX<sup>3</sup> size 1600 and DMX<sup>3</sup> size 2500

## DMX<sup>3</sup> DRAW-OUT VERSION

DMX<sup>3</sup> size 1600 and DMX<sup>3</sup> size 2500

### MOUNTING PRINCIPLE

In XL<sup>3</sup> and XL<sup>3</sup> S, the DMX<sup>3</sup> devices and the associated busbars are arranged according to an identical principle for power ratings up to 4 000 A, that is, the possibility of mounting two devices per enclosure.

The installation height of DMX<sup>3</sup> units is always 600 mm whatever the type and size of the device. When 2 DMX<sup>3</sup> devices are installed in the same cell, this leaves at least a useful 600 mm for running the busbars.

## Equipment for DMX<sup>3</sup> 1600 transfer switches - Installation principle

### Choice of cable interlock

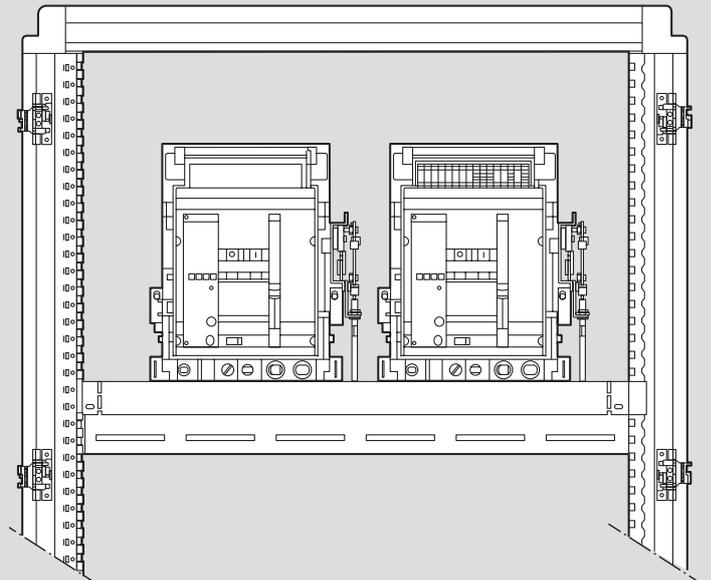

Calculation of cable length:  
 $L1 = 600 + H$   
 $L2 = 950 + V$

### Installation principle

#### For XL<sup>3</sup> 4000 - 36 modules

2 DMX<sup>3</sup> / DMX<sup>3</sup>-I can be installed side by side on the same fixing plate.

Automatic transfer switch control units

## Auxiliaries and accessories for DMX<sup>3</sup> 2500, 4000 and 6300

Pack	Cat.Nos	Control and signalling auxiliaries
		<b>Shunt trip</b> When energised the circuit breaker will be tripped
1	0 288 48	24 V~/=
1	0 288 49	48 V~/=
1	0 288 50	110 - 130 V~/=
1	0 288 51	220 - 250 V~/=
1	0 288 52	415 - 480 V~
		<b>Undervoltage releases</b> When the coil is de-energised, the circuit breaker will be tripped
1	0 288 55	24 V~/=
1	0 288 56	48 V~/=
1	0 288 57	110 - 130 V~/=
1	0 288 58	220 - 250 V~/=
1	0 288 59	415 - 480 V~
		<b>Module for delayed tripping</b> To be used with above undervoltage releases
1	0 288 62	110 V~/=
1	0 288 63	230 V~/=
		<b>Motor operators</b> To motorize a DMX <sup>3</sup> , it is possible to attach, to the motor operators, a release coil (undervoltage or trip on energising) and a closing coil
1	0 288 34	24 V~/=
1	0 288 35	48 V~/=
1	0 288 36	110 - 130 V~/=
1	0 288 37	220 - 250 V~/=
1	0 288 38	415 - 440 V~
1	0 288 40	480 V~/=
		<b>Closing coils</b> Enables remote closing of the circuit breaker if the closing spring is charged
1	0 288 41	24 V~/=
1	0 288 42	48 V~/=
1	0 288 43	110 - 130 V~/=
1	0 288 44	220 - 250 V~/=
1	0 288 45	415 - 480 V~
		<b>Signalling contact for auxiliaries</b> Signalling contact for shunt trips, undervoltage releases and closing coils
1	0 288 16	
		<b>Signalling contact for draw-out version</b> Inserted / test / draw-out signalling contact
1	0 288 13	3 changeover contacts per position

Pack	Cat.Nos	Locking
		<b>Key locking in "open" position</b> Lock and star key N° HBA90GPS6149 - to be fitted on the frame Cat.No 0 288 28
1	0 288 30	
1	0 288 31	Lock and flat key N° ABA90GEL6149 - to be fitted on the frame Cat.No 0 288 28
1	0 288 28	2 hole support frame for locks
1	0 288 29	Cat.Nos 0 288 30/31 Set of 5 key barrels with flat key
		<b>Key locking in the draw-out position</b> Mounting of the lock on the base
1	0 288 32	Lock and star key N° HBA90GPS6149
1	0 288 33	Lock and flat key N° ABA90GEL6149
		<b>Door locking</b> Prevents opening of the door with the circuit breaker closed
1	0 288 20	Left-hand and right-hand side mounting
		<b>Padlocks in "open" position</b> Padlocking system for ACB (padlock not supplied)
1	0 288 21	
1	0 288 24	Padlock for buttons
1	0 288 26	Padlocking system for shutters (padlock not supplied)
		<b>Equipment for conversion of a fixed device into draw-out device</b>
		<b>Bases for draw-out device</b>
1	0 289 02	3P   0 289 03 4P
1	0 289 04	0 289 05
1	0 289 13	0 289 14
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 2500
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 4000
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 6300
		<b>Transformation kit for draw-out version</b>
1	0 289 09	0 289 10
1	0 289 11	0 289 12
1	0 289 15	0 289 16
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 2500
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 4000
		For DMX <sup>3</sup> /DMX <sup>3</sup> -I frame 6300
		<b>Accessories</b>
1	0 288 25	Rating mis-insertion device Prevents the insertion of a draw-out circuit breaker in an incompatible base
1	0 288 23	Operations counter Counts total number of operation cycles of the device
1	0 288 14	Contact "ready to close" with charged springs
1	0 288 15	Additional signalling contact
1	0 288 79	Lifting plate

## Rear terminals for DMX<sup>3</sup> 2500, 4000 and 6300

Dimensions p. 42-46

Pack	Cat.Nos		Rear terminals
1	3P 0 288 84	4P 0 288 85	<b>For DMX<sup>3</sup> frame 2500 fixed version</b> For flat connection with bars To be fixed onto horizontal rear terminals of the circuit breaker
1	0 288 82	0 288 83	For vertical connection with bars Those terminals are used in order to transform a flat connection into a vertical one To be fixed onto Cat.Nos 0 288 84/85 according to the number of poles
1	0 288 96	0 288 97	<b>For DMX<sup>3</sup> frame 2500 draw-out version</b> For vertical or horizontal connection with bars To be fixed onto plate rear terminals of the circuit breaker
1	0 288 92	0 288 93	<b>For DMX<sup>3</sup> frame 4000 and 6300 fixed version</b> For flat connection with bars To be fixed onto horizontal rear terminals of the circuit breaker 2 sets are required for frame 6300
1	0 288 94	0 288 95	<b>For DMX<sup>3</sup> frame 4000 and 6300 fixed or draw-out version</b> On DMX <sup>3</sup> fixed version: - For vertical connection with bars - To be fixed onto Cat.Nos 0 288 92/93 according to the number of poles On DMX <sup>3</sup> draw-out version: - For vertical or horizontal connection with bars - To be fixed directly onto plate rear terminals of the circuit breaker 2 sets are required for frame 6300
			<b>Spreaders for DMX<sup>3</sup> frame 2500 fixed version</b>
1	3P 0 288 86	4P 0 288 87	To be fixed onto horizontal rear terminals of the circuit breaker
1	0 288 88	0 288 89	For flat connection with bars
1	0 288 90	0 288 91	For vertical connection with bars For horizontal connection with bars
			<b>Insulation shields</b>
1	3P 0 288 98	4P 0 288 99	<b>For fixed version</b> Insulation shields for DMX <sup>3</sup> /DMX <sup>3</sup> -I frames 2500 / 4000 / 6300
1	0 288 18	0 288 19	<b>For draw-out version</b> Insulation shields for DMX <sup>3</sup> /DMX <sup>3</sup> -I frames 2500 / 4000 / 6300

## Equipment for DMX<sup>3</sup> 2500, 4000 and 6300 transfer switches

Technical characteristics p. 50

Pack	Cat.Nos	Equipment for transfer switches
		The mechanical interlock is set up using cables and can interlock 2 or 3 devices, which may be different type in a vertical or horizontal configuration The interlock unit is mounted on the right-hand side of the device Cable interlock to be ordered separately (cable length to be specified according to every configuration - see below)
1	0 288 64	Interlock for DMX <sup>3</sup> frame 2500
1	0 288 65	Interlock for DMX <sup>3</sup> frame 4000
1	0 288 66	Interlock for DMX <sup>3</sup> frame 6300
		<b>Cable interlock</b>
		Length
1	0 289 17	1000 mm
1	0 289 18	1500 mm
1	0 289 20	2600 mm
1	0 289 21	3000 mm
1	0 289 22	3600 mm
1	0 289 23	4000 mm
1	0 289 24	4600 mm
1	0 289 25	5600 mm

4 226 89

Technical characteristics **p. 50**  
Configuration software **see e-catalogue**

They can control transfer switching between two sources, manage generator start/stop, control single phase, two-phase and three-phase networks, control phase-phase and phase-neutral voltages  
For DPX<sup>3</sup> and DMX<sup>3</sup> circuit breakers and CTX<sup>3</sup> contactors

Pack	Cat.Nos	Automatic transfer switch control units	Pack	Cat.Nos	Dual power supply selector
1	4 226 80	For standard management of 2 circuit breakers 6 programmable digital inputs and 6 programmable relay outputs Digital display Power supply: 12...48 V <sub>DC</sub> IP54	1	4 226 86	Dual power supply selector measures and controls two supply voltages at its inputs (single phase, 230 V <sub>AC</sub> ) and selects the most adapted voltage for auxiliary circuits supply Equipped with 1 alarm contact, if no supply voltage can be selected within the limits
1	4 226 82 <sup>1</sup>	For advanced management of 2 circuit breakers 6 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 2 plug-in modules between: - extension modules Cat.No 4 226 90/91/92 - opto-isolated RS485 communication interface Cat.No 4 226 89 LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.No 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24 V <sub>DC</sub> ; 110-240 V <sub>AC</sub> IP40	1	4 226 89	<b>Plug-in modules</b> Opto-isolated RS485 interface
1	4 226 83 <sup>1</sup>	For advanced management of 3 circuit breakers 8 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 3 plug-in extension modules between Cat.No 4 226 90/91/92 Integrated opto-isolated RS485 communication interface LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.No 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24-48 V <sub>DC</sub> ; 110-240 V <sub>AC</sub> IP65	1	4 226 90	4 opto-isolated static outputs
			1	4 226 91	2 relay outputs, rated 5 A 250 V <sub>AC</sub>
			1	4 226 92	2 opto-isolated digital inputs and 2 relay outputs rated 5 A 250 V <sub>AC</sub>
					<b>Communication accessories</b> These communication devices can be used to connect Alptec 8 and Alptec 3.2/5.2/8.2 power factor controllers and automatic transfer switch controllers to a computer; smartphone or tablet For programming, downloading data, diagnostics and upgrading the firmware
			1	4 226 87 <sup>1</sup>	<b>USB front connector</b> Computer connection cable with USB connector The computer identifies the connection as a standard USB connection. There is no need to switch off the controller power supply
			1	4 226 88 <sup>1</sup>	<b>Wi-Fi front connector</b> Wi-Fi connection device compatible with computers, smartphones and tablets There is no need to switch off the controller power supply

## technical characteristics (continued)

### Technical characteristics

#### DMX<sup>3</sup> 1600

DMX <sup>3</sup> according to IEC 60947-2		DMX <sup>3</sup> 1600	
		42 kA	50 kA
Frame current (A)		1600	
Number of poles		3P-4P	
Rating In (A)		630/800/1000/1250/1600	
Rated insulation voltage Ui (V)		1000	
Rated impulse withstand voltage Uimp (kV)		12	
Rated operational voltage (50/60Hz) Ue (V)		690	
Category of use		B	
Ultimate breaking capacity Icu (kA)	220 / 240 V $\sim$	42	50
	380 / 415 V $\sim$	42	50
	440 / 460 V $\sim$	42	50
	480 / 500 V $\sim$	42	50
	600 V $\sim$	42	42
	690 V $\sim$	42	42
Service breaking capacity Ics (% Icu)		100 %	100 %
Short-circuit making capacity Icm (kA)	220 / 240 V $\sim$	88	105
	380 / 415 V $\sim$	88	105
	440 / 460 V $\sim$	88	105
	480 / 500 V $\sim$	88	105
	600 V $\sim$	88	88
	690 V $\sim$	88	88
Short time withstand current Icw (kA) for t = 1 s	220 / 240 V $\sim$	42	50
	380 / 415 V $\sim$	42	50
	440 / 460 V $\sim$	42	50
	480 / 500 V $\sim$	42	50
	600 V $\sim$	42	42
	690 V $\sim$	42	42
Magnetic threshold	Istantaneous releases li (x In)	(2 ÷ 15) & Icw	
Isolation behavior		Yes	
Endurance (cycle)	mechanical without maintenance	5000	
	mechanical with maintenance	10000	
	electrical	1500 at 690 V / 3000 at 415 V	

### Temperature derating

#### Fixed and draw-out version

Temperature	40°C		50°C		60°C		65°C		70°C	
	I <sub>max</sub> (A)	I <sub>r</sub> / I <sub>n</sub>	I <sub>max</sub> (A)	I <sub>r</sub> / I <sub>n</sub>	I <sub>max</sub> (A)	I <sub>r</sub> / I <sub>n</sub>	I <sub>max</sub> (A)	I <sub>r</sub> / I <sub>n</sub>	I <sub>max</sub> (A)	I <sub>r</sub> / I <sub>n</sub>
DMX <sup>3</sup> 1600	630	1	630	1	630	1	630	1	630	1
	800	1	800	1	800	1	800	1	800	1
	1000	1	1000	1	1000	1	1000	1	950	0.95

	1600	1	1600	1	1330	0.83	1280	0.8	1216	0.76

### Derating at different altitudes

Air circuit breaker	DMX <sup>3</sup> 1600			
Altitude H (m)	< 2000	3000	4000	5000
Rated current (at 40°C) I <sub>n</sub> (A)	I <sub>n</sub>	0.93 x I <sub>n</sub>	0.88 x I <sub>n</sub>	0.82 x I <sub>n</sub>
Rated voltage U <sub>e</sub> (V)	690	600	500	440
Rated insulation voltage U <sub>i</sub> (V)	1000	900	750	600

### Minimum recommended dimension of copper busbars per pole

I <sub>n</sub> (A)	Fixed version		Draw-out version	
	Horizontal bars (mm)	Vertical bars (mm)	Horizontal bars (mm)	Vertical bars (mm)
630	2 x 40 x 5	2 x 40 x 5	2 x 40 x 5	2 x 40 x 5
800	2 x 30 x 10	2 x 50 x 5	2 x 50 x 5	2 x 30 x 10
1000	2 x 30 x 10	1 x 60 x 10 / 2 x 60 x 5	2 x 60 x 5	2 x 30 x 10
1250	2 x 40 x 10	1 x 80 x 10 / 2 x 40 x 10	2 x 80 x 5	2 x 40 x 10
1600	2 x 50 x 10	2 x 50 x 10	2 x 50 x 10	2 x 50 x 10

Note: The tables presenting the minimum recommended dimensions of connection plates and bars per pole should be used solely as a general guideline for selecting products. Due to extensive variety of switchgear constructions shapes and conditions that can affect the behavior of the apparatus, the solution used must always be verified

For minimum recommended section of aluminium busbars

1000	80 x 10	80 x 10
1250	80 x 10	2 x 60 x 10
1600	2 x 60 x 10	2 x 80 x 10
2000	2 x 80 x 10	3 x 80 x 10
2500	3 x 80 x 10	3 x 80 x 10

### Frame 6300 - fixed and draw-out versions

I <sub>n</sub> (A)	Vertical bars (mm)	Horizontal bars (mm)
5000	6 x 100 x 10	6 x 100 x 10
6300	7 x 100 x 10	7 x 100 x 10

Note: The tables presenting the minimum recommended dimensions of connection plates and bars per pole should be used solely as a general guideline for selecting products. Due to extensive variety of switchgear constructions shapes and conditions that can affect the behavior of the apparatus, the solution used must always be verified

### Frame 4000 - fixed and draw-out versions

I <sub>n</sub> (A)	Vertical bars (mm)	Horizontal bars (mm)
630	1 x 40 x 10 or 2 x 40 x 5	2 x 40 x 5
800	1 x 50 x 10 or 2 x 50 x 5	2 x 50 x 5
1000	1 x 50 x 10 or 2 x 50 x 5	2 x 50 x 5
1250	2 x 50 x 5	1 x 50 x 10 + 1 x 50 x 5
1600	1 x 50 x 10 + 1 x 50 x 5	2 x 50 x 10
2000	2 x 50 x 10	2 x 60 x 10
2500	3 x 50 x 10	3 x 60 x 10
3200	3 x 100 x 10	3 x 100 x 10
4000	4 x 100 x 10	5 x 100 x 10

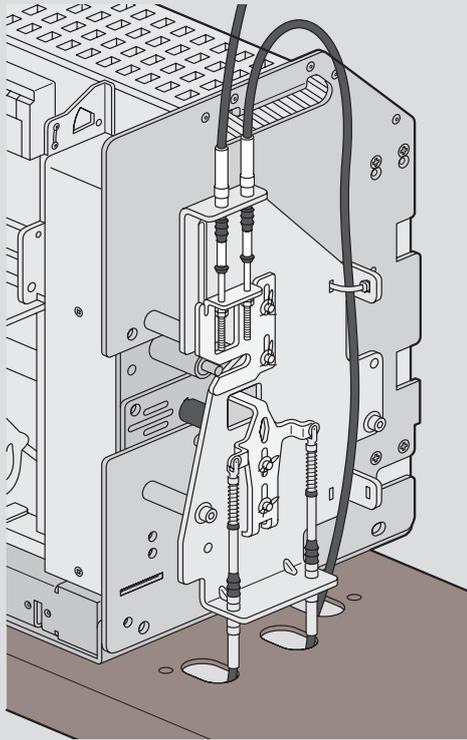

For minimum recommended dimensions of aluminium busbars  
Please, consult us

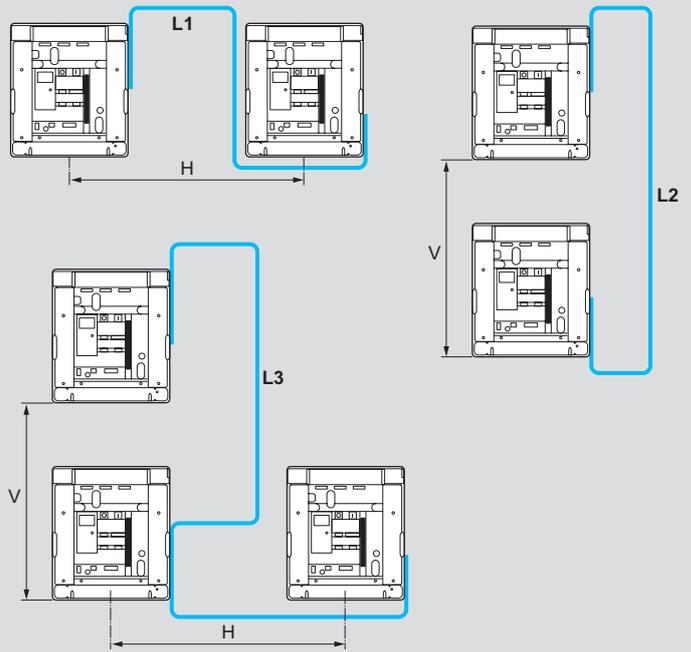

# Supply invertors equipment for DMX<sup>3</sup> 2500, 4000 and 6300

## installation principle

### Mounting of interlock unit

### Choice of cable interlock

Calculation of cable length:

$$L1 = 1430 + H$$

$$L2 = 1570 + V$$

$$L3 = 1430 + V + H$$

# Automation control units for transfer switches

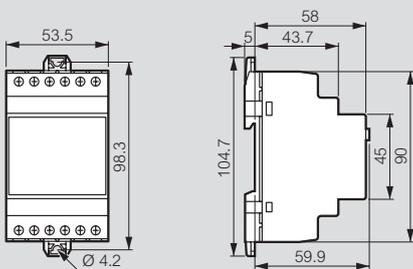

## technical characteristics and dimensions
